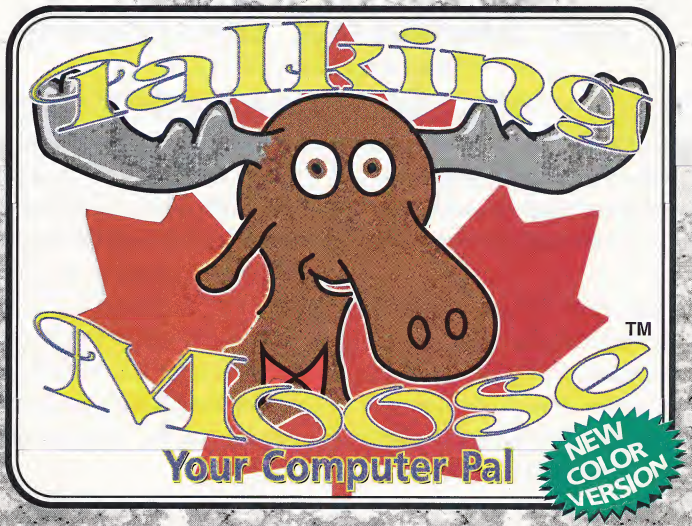
MacPAKS™

Mini Catalog

Affordable Software for the Macintosh

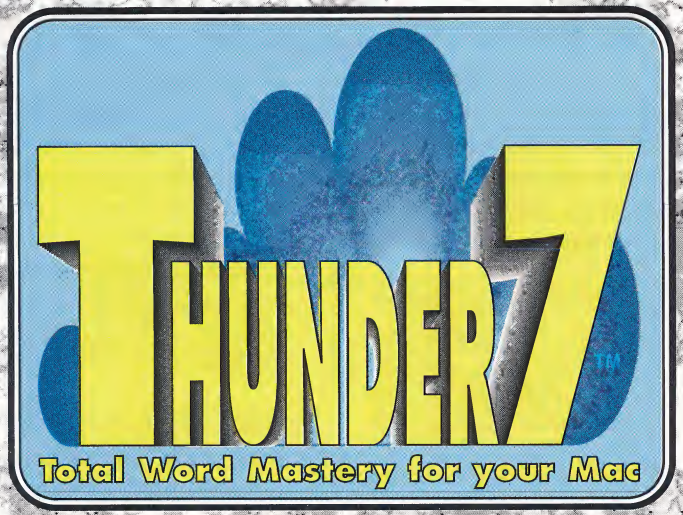
Baseline Publishing, Inc.

MacPAKS Series

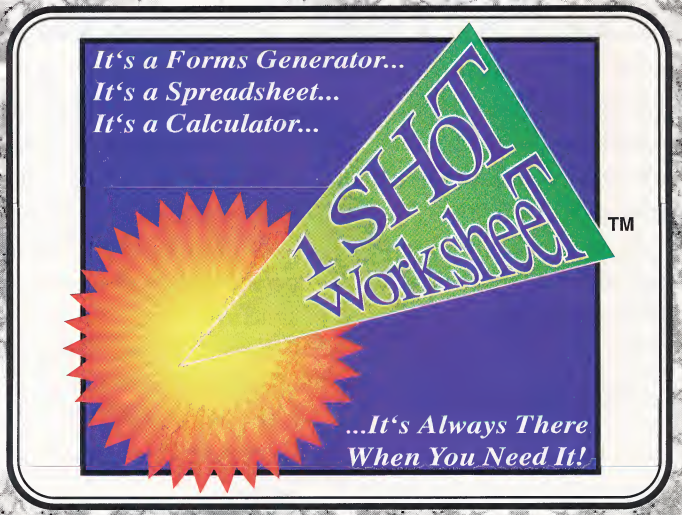


No one does it better than the Moose! A true cult hero, the Talking Moose has been around almost as long as the Mac. Reading your mail to you, speaking your file names or just cracking jokes, the Moose has arrived from the Great White North of Canada. Complete with its own phrase editor, Moose Proof DA, HyperCard XCMDs, and FKEYs; the Moose will speak your mind or his own.

Baseline Publishing, Inc.

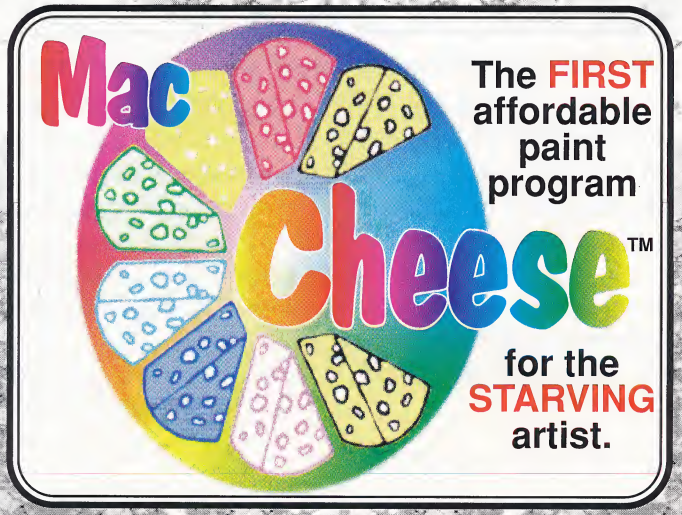


Thunder 7 delivers benefits well beyond any onboard spelling checker or thesaurus. Thunder 7 will interactively indicate each spelling or puncutuation error you make as you make it. Using Thunder 7 you can batch check selections, expand your creativity with the integrated thesaurus, or use the glossary to automatically correct your most frequently mispelled words.



1 Shot Worksheet is designed for the times when a spreadsheet is too much to set up and a forms program too complex for a simple job. Combining the features of both, proposals, estimates, amortization schedules, and many other repetitive graphic, text, and numerical tasks can all be simplified with this powerful desk accessory.

MacPAKS Series



Paint with the soft watercolor textures of a piece of Brie or sketch out bold lines with a wedge of sharp Cheddar. MacCheese is feature laden with advanced painting tools that you would only expect to find in expensive paint programs. Let your talents explode onto the canvas with full 32 bit color expression. Who says you have to have a big government grant to do beautiful work on the Mac?

MacPAKS Series

INIT Manager helps prevent the nightmare of determining which INIT program is "crashing" your system. With INIT Manager you can save working sets, rearrange loading orders, disable select INITs, and generate detailed reports on the interaction between the INITs you run and the Mac system.

Using INIT Manager you take control!

APB EXPRESS™ the One Button Backup (formerly ExpressTape) is the simplest, general purpose backup program available, with the broadest tape drive support in the industry. With one click APB delivers full or incremental backups of your valuable data from a hard disk, server, or A/UX partition to practically any tape, optical disk or removable media drive.

Baseline Publishing, Inc.

APB EXPRESS™

The One Button BackUp

- Simple, reliable backup system for most all block-addressable and streaming tape drives, optical disks, floppys, and removable media cartidges.
- Defacto file format standard for most tape drives including Apple.
- Produce custom scripts to enhance backup strategy.
- Automatic shutdown after backups.
- Schedule backups to execute at a specific time and date.
- Improved handling of Apple's 40SC tape drive. Improves performance and speed by over 400%.
- Mirror image backups preserve AppleShare server access privileges.
- Flag files for backup by a file selector flag or last backup date.
- Backup over networks and distributed file serving systems.
- Fast, affordable and easy to use.

Minimum System Requirements

This program will run on a Macintosh with 1 or more megabytes of memory using System 6.0 or greater. Use of MultiFinder is NOT recommended for backups! Not copy protected.

MacPAKS Statistics

INIT Manager™

Take Control!

- Save sets of INITs to customize your work environment.
- Rearrange the sequence order of your INITs by simple pointing and clicking.
- Reduce System Folder clutter by consolidating INITs into one folder.
- Disable INITs before they run.
- Track INITs that cause crashes. INIT Manager will prevent troublesome, un-stable INITs from loading.
- Generate detailed reports on the INITs you run including the operating environment of your Macintosh. INIT Manager features in depth analysis of the INITs running; time to load, memory requested, and the patches made by the INITs.
- Force INITs to show their icons on startup or suppress them at your discretion.
- Prevent unauthorized running of INITs.
- Run INITs outside of the System Folder.

Minimum System Requirements

This program will run on a Macintosh with 1 or more megabytes of memory using System 6.0 or greater. MultiFinder friendly. Not copy protected.

MacCheese™

The FIRST affordable paint program for the STARVING Artist!

- We can't guarantee you will be a great artist, but MacCheese won't prevent you from becoming one.
- Paint with 2, 4, 16, 256, thousands, or millions of colors, even if you don't have the hardware.
- Background Pane options allows you to use other artwork as a template you can paint over.
- Special tools: Water Drop softens edges. Rake scatters pixels. Transmogrifier texturizes colors.
- Advanced painting tools you would only expect to find in more expensive programs.
- Create radial and linear gradient fills for special effects.
- On line help window explains every tool and command.
- Create, save, and paint with color patterns up to 64 by 64 pixels in size.
- Floating palettes show colors, tools, color wheel, coordinates, and help.

Minimum System Requirements

This program will run on a Macintosh with 1 or more megabytes of memory using System 6.0 or greater. MultiFinder friendly.
Not copy protected.

1 Shot Worksheet™

... Always There When You Need It!

- Quicker to use than a spreadsheet; accessible in any program.
- Generate a page or a book of calculating forms with full graphic support.
- More powerful than a programmable calculator and easier to use.
- Provides 130+ math functions including present future values, time & date calculations, financial form-ulas, and more!
- Link formulas with other pages of the same workbook
- Fast, affordable and easy to use.
- Generate an unlimited number of workbook files with up to 25 pages per workbook.
- Create up to 100 fields per page with any font, size, and style.
- Scan in existing forms and graphics as background pictures to customize your worksheet or to illustrate a formula.
- Place up to 100 fields, labels, and pictures on each worksheet.
- Ideal for estimating, proposals and scientific problem solving.

Minimum System Requirements

This program will run on a Macintosh with 1 or more megabytes of memory using System 6.0 or greater. MultiFinder friendly.
Not copy protected.

THUNDER 7™

Total Word Mastery

- Thunder 7 is a spelling and word companion that runs in every application you designate.
- Interactive spelling checker watches the words you type, alerting you to spelling, capitalization, and punctuation errors the moment you make one.
- Thesaurus contains definitions, antonyms, synonyms, contrasting and related words.
- Create specific dictionaries and glossaries for your special applications.
- Thunder 7 delivers broad compatibility with other Mac applications. Using external modules for reading and manipulating stylized text, Thunder 7 stays friendly with the latest applications.
- New 1.4 million word thesaurus makes finding words a snap.
- User definable glossaries expand abbreviations and correct frequently misspelled words on the fly. Correct a common mistake once and Thunder 7 knows to do it for you next time.

Minimum System Requirements

This program will run on a Macintosh with 1 or more megabytes of memory using System 6.0.3 or greater. Hard disk strongly recommended. MultiFinder & System 7 friendly. Not copy protected.

The Talking Moose™

Your Computer Pal

- When the Moose speaks his animated picture appears on your desktop in one of several selectable positions.
- The Moose has a distinct Canadian accent (at no extra charge), but if you tire of the way the Moose sounds you can alter the speed at which he speaks and the pitch of his voice.
- The Moose at your preference, will speak the menu selections you choose, the names of the windows you open, and read the text in dialogs.
- Provided with the Moose Proof desk accessory; just copy text to the clipboard, open the DA and the Moose will read your text.
- Two user selectable Mooses to chose from; a low memory consuming black & white version, or the full glorious color one.
- The Moose greets you at startup, says goodbye on shutdown, and throws in funny (provocative? teasing? surprising? ...you judge) comments at selectable intervals.

Minimum System Requirements

This program will run on a Macintosh with 1 or more megabytes of memory using System 6.0 or greater. MultiFinder friendly. Not copy protected.
